

**Parker Building Supplies launches a cost-effective, safe and green alternative to bark chippings**

## IDEAL FOR LANDSCAPES ... AND PLAYSCAPES

Ecoscope Rubber Mulch is a shredded rubber top surface from our friends at Bradstone. A more cost effective, safe and longer lasting alternative to bark chippings, its the ideal choice for landscapes and playscapes.

Rubber Mulch is comprised of 100% recycled, 100% non-toxic, soft shredded rubber. It is metal and fibre free, eco-friendly and available and in a choice of colours to blend in with your own project.

The rubber retains no moisture and does not absorb valuable nutrients from the soil, so it can be used for landscaping, flower beds, pot toppers etc.

- Unlike bark chippings, it doesn't have the feel of cat litter so it doesn't attract pets or wildlife !
- Available in 10kg bags and in a choice of Brown and Green
- Certified for playground use - European Standard EN1177
- 10 year warranty against colour loss

Rubber Mulch uses less volume than standard rubber chippings and bark chippings so it is much cheaper to install ...

**Coverage Comparison:**  
Compared to 100L bag of Natural Play Area Bark

	Coverage		
	8m <sup>2</sup>	16m <sup>2</sup>	20m <sup>2</sup>
<b>Rubber Mulch</b>	9 bag	19 bags	24 bags
