

Parkers launches new Farming and Agricultural Products catalogue

PLOUGHING A NEW FIELD

Parker Building Supplies have just launched a new catalogue which brings together a range of items we have supplied for a long period of time but never thought to brand under one banner ...

Farming and Agricultural Products.

Our comprehensive range includes

- Fencing, Gates and Accessories • Barn Conversion
- Brickmatching and Blocks • Roofing, Tiles and Trusses
- Ironmongery and Security • Tools and Fixings
- Oil and Sewage Tanks and Cess Pools
- Geotextiles and Rainwater Harvesting
- Safety Clothing and Boots

Not only does the catalogue feature a broad range of products, essential accessories and consumables, but there is also a font of good advice. No matter in which sector of the agricultural or farming industries you happen to specialise we think we've included all the products you could possibly need.

Our range of agricultural and farming products includes everything from tanks and geotextiles to workwear and handmade bricks
