

GREAT SUMMER OFFERS FROM PARKER BUILDING SUPPLIES

The latest Parker Building Supplies discount leaflet has now been published and could be landing on your doormat any day now. The current edition features a range of products for the professional and keen amateur landscape designer including ...

UNTREATED OAK SLEEPERS

EU law now forbids the use of reclaimed railway sleepers inside buildings, in toys, in playgrounds, or in gardens where there may be a risk of frequent skin contact. This is because traditional sleepers were treated with creosote, which were subsequently found to be comprised of a number of carcinogenic substances.

As a consequence there is a growing demand for new, untreated oak sleepers which can be used for a wide range of projects in the home and in the garden, and in domestic or commercial environments.

They make excellent lintels or beams and can be used to manufacture garden furniture.

each

Call your local branch for your copy of our Summer Offers leaflet

Professional landscape designers use new oak railway sleepers for a wide range of installations such as retaining walls, raised beds, fencing, steps, kerbs, patios and decks because they are clean, safe and easy to work with. They are also completely weatherproof and will endure for decades, free from rot and will weather to an attractive silver colour without the need for preservatives.

Oak Sleepers are also increasingly used inside the home for such installations as lintels, beams and even fire surrounds.

All prices are subject to VAT @ 15%. Offers are subject to availability of stock. E and OE. Copyright Parker Building Supplies 2009. Offers available from all branches and valid until 31st August 2009.
