

**Parkers now supply Oakmasters oak trusses**

# PARKERS: MASTERS OF OAK BEAMS

**Parker Building Supplies now offer Oakmasters bespoke oak beam solutions including structural or aesthetic oak beams, oak ceiling beam layouts and beamed ceilings, oak roof trusses, complete oak roofs, tudor cladding, oak fireplace beams and oak beam casings (designed to conceal steel joists). The Oakmasters range is ideal for new build and refurbishment projects.**

Oakmasters have over twenty years of experience in bringing oak-work of exceptional quality to private and commercial customers both at home and overseas. Demand for Oakmasters oak beams, oak framed building kits and other oak products and services grows every year. Parkers branches can now provide you with all the information you need relating to these oak beam products and services.

As a case in point, Mr and Mrs Walker contacted Oakmasters last year seeking a new oak roof for their Coach House in Hankham, East Sussex. One of the main challenges was to design an oak roof that maximised head height and usable space, whilst being sympathetic in character to the original roof design.

Mr and Mrs Walker's project caught the eye of the producers of the Channel 4 TV show 'Restoration Man' and is to be featured in the next series which begins in Autumn 2009.

Oakmasters designed structural, attic style trusses which met the requirements of the local Conservation Officer and maximised the use and functionality of the first floor area. The oak was procured from sustainable sources and the trusses were fabricated and supplied as pre-assembled units ready to lift into position, thus minimising assembly time.
