

Parker Kitchens launch a new range of solid surface kitchen worktops

MAIA SOLID SURFACES FROM SYLMAR

maia, by Sylmar, is the number one composite solid surface kitchen worktop available in the UK. **maia**'s innovatively designed and extremely hygienic worksurfaces have been awarded the FIRA Gold award for product excellence.

The range includes décors covering all tastes. You can see the new cream **maia** display in the Parker Kitchens Showroom adjacent to the Parker Building Supplies Hailsham branch now.

Sylmar is proud to manufacture its **maia** worksurfaces in the UK. **maia**'s luxurious and hardwearing worksurfaces have an excellent stain resistance, seamless joins and natural tactility. Worktops come with a **five-year guarantee**, and can be repaired if damaged, which means their flawless appearance can be maintained for the lifetime of the kitchen.

The two most recent innovative design solutions from **maia**, decorative support panels and new curved end breakfast bar, demonstrate an ongoing commitment to product development. **maia**'s new decorative support panels have been designed to incorporate the trends for framed kitchens. They can also be used as a leg for a breakfast bar, in either the 45mm or the hunkier 100mm thickness. Both are faced on three sides with the selected decor for the fully coordinated effect, and can be cut down to size if necessary.

The new range of curved end breakfast bars are stylish, functional and beautifully designed. Each corner of the 1800mm and 3600mm blanks has a hand-finished curve of 240mm radius. Sizes can be cut down and re-joined for shorter lengths.

Visit Parker Building Supplies today to find out more about maia's stylish and durable solid surface solutions.
