

Parkers unveils state-of-the-art fleet of vehicles

DELIVERING THE GOODS

At Parkers we have a reputation for delivering an excellent level of service, and price is (believe it or not !) not always the most important issue for our customers. When you are on site and expecting a timed delivery, you need it to be there come hell, high water or M25 traffic !

We guarantee to provide our clients with prompt and secure delivery of all stock items, and to despatch ordered items by return anywhere in our branch network area. We are also increasingly conscious of the need for efficient materials and heavyside product handling, and Health and Safety requirements.

As a consequence, our fleet of vehicles are all equipped with fully remote-controlled Atlas cranes, satellite navigation and tracking, helping us to deliver the products you need, to your door or on site, to meet your most demanding schedule.

Trust Parkers to deliver ... on time every time !
